Take a **STEP** toward better **HEALTH**

Walking for as little as 30 minutes a day can have the following health benefits:

- Reduce the risk of coronary heart disease
- Improve blood pressure and blood sugar levels
- Maintain body weight and lower the risk of obesity
- Enhance mental well-being
- Improve blood lipid profile
- Reduce the risk of osteoporosis
- Reduce the risk of breast and colon cancer
- Reduce the risk of Type 2 diabetes

Walking is low impact; easier on the joints than running. It is safe – with a doctor’s okay – for people with orthopedic ailments, heart conditions, and those who are more than 20% overweight. That quick stroll around the block seems a little more worthwhile now, doesn't it?

**Join Dr. Cook** and other people looking to improve their health at the next **Walk With A Doc**.

**Time:** Saturday November 30th at 11am  
**Location:** Laura Howe Marsh  
**Who can attend:** Anyone!
